DETAILED ACTION

Response to Arguments

Applicant's arguments filed 12/12/03 have been fully considered but they are not persuasive.

Applicant argues, "Florin fails to teach or suggest displaying information from the plurality of information sources in a plurality of dimensions and levels such that a substantial portion of the necessary information can be seen and navigated on a minimum number of screens in such a way as to enable relatively easy navigation through the plurality of programs to make programming decisions and selections."

In response, the Examiner cites Florin with menu screen arranged to display two-dimensional icons and levels (plurality of sub-menu; i.e., user select icon 315 of Fig. 28; in which the screen displays the second level of sub-menu 360) such that a substantial portion of the necessary information (el. 360 or 300) can be seen and navigated on a minimum number of screens when the user uses the remote control to navigate and select the icon selected.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2611

1. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Florin et al. (US 5583560).

Regarding claim 1, Florin discloses an information providing apparatus (Fig. 1-2, element 54) for displaying information on a screen (Fig. 6-50), based on information data provided through a plurality of information sources (Fig. 1, elements 50, 56, 57), characterized by comprising:

Means 67 for obtaining index information (television program listing; Col. 2, lines 53-59; Col. 10, lines 61-65+) from a 1st information source 50 of the plurality of information sources;

means 69 for obtaining index information (i.e., listing of all programs recorded on the VCR; Col. 16, lines 40-50) from a 2nd information source (i.e., VCR 56) of the plurality of information sources;

means (TV 58) for displaying a categorized menu on the screen (Fig. 22-35 menu of icons/still images; Col. 3, lines 13-21 and Col. 20, lines 51-65), based on the obtained index information from the 1st and 2nd information (Col. 20, lines 28-31); and

means (Fig. 3, element 63) for obtaining necessary information from the 1st or 2nd information source, in response to selection operation on the menu screen, and for displaying information based on the necessary information (Fig. 33, elements 380, 375 Col. 20, lines 34-50).

Wherein the menu screen is arranged to display the information in a plurality of dimensions (two-dimensional icons) and levels (plurality of sub-menu; i.e., user

select icon 315 of Fig. 28; in which the screen display the second level of sub-menu 360) such that a substantial portion of the necessary information (el. 360 or 300) can be seen and navigated on a minimum number of screens to enable relatively easy programming decisions and selections.

Regarding claim 2, Florin further discloses wherein the necessary information is index information (i.e., EPG program information; Col. 10, lines 61-66 with channel number provided from the service provider 50) for displaying the categorized menu (Col. 15, lines 17-40).

Regarding claim 3, Florin further discloses that the index information from the 1st information source 52 (Fig. 2; television program listing) is obtained through the network 52 of Fig. 1 (Col. 2, lines 53-59 and Col. 10, lines 45-65+).

Regarding claim 4, Florin discloses an information providing method for displaying information on a screen (Fig. 6-50; Summary of the Invention), based on information data provided through a plurality of information sources (Fig. 1, elements 50, 56, 57), is analyzed with respect to apparatus claim 1.

Regarding claim 5, Florin further discloses wherein the necessary information is index information (i.e., EPG program information; Col. 10, lines 61-66 with channel

number provided from the service provider 50) for displaying the categorized menu (Col. 15, lines 17-40).

Regarding claim 6, Florin further discloses that the index information from the 1st information source 52 (Fig. 2; television program listing) is obtained through the network 52 of Fig. 1 (Col. 2, lines 53-59 and Col. 10, lines 45-65+).

Regarding apparatus claim 7 and method claim 8, Florin further discloses wherein the minimum number of screens is one (Fig. 22-35)

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
